BIOGRAPHY

Jiangjie Chen (陈江捷) is a fourth-year Ph.D. candidate at Fudan University in the School of Computer Science, Shanghai, China. His mainly interested research topics include (but are not limited to):

- **Machine reasoning**, especially on endowing and evaluating various kinds of human-level reasoning abilities to large language models, including analogical reasoning, counterfactual reasoning, decision-making, strategic planning, etc.;
- **Text generation**, especially on the building of factual, faithful, consistent, controllable, and knowledge-guided large language models;
- **The intersect** of both directions, i.e., understanding and utilizing the vehicle of natural language to drive human-level reasoning for large language models.
